Title: Exploitation Log - Metasploitable2 Tomcat
Target: 192.168.56.104:8180 (Metasploitable2 Tomcat Service)
Tool: Metasploit (exploit/multi/http/tomcat_mgr_deploy)

Exploit Log:

Exploit ID	Description	Target IP	Status	Payload
003	Apache Tomcat Manager Auth Bypass / Deployer	192.168.56.104	**Success**	java/meterpreter/reverse_tcp

Validation & PoC Summary (50 words):
The exploit was successfully executed by authenticating to the Tomcat Manager portal with default credentials (tomcat:tomcat). A malicious WAR file was uploaded and executed, granting a remote Meterpreter shell. This confirms the system is vulnerable due to weak credentials, a common misconfiguration.

Evidence: See screenshots 05_Metasploit_Module_Setup.png and 06_Metasploit_Success_Sysinfo.png.
