Title: OSINT Reconnaissance Report - vulnweb.com
Date: August 28, 2025
Tools: WHOIS, Sublist3r, Nmap, Shodan

Reconnaissance Log:

Timestamp	Tool	Finding
2025-08-28 03:39:00	WHOIS	Registrar: EuroDNS. Created: 2010-06-14. Name Servers: ns1.eurodns.com
2025-08-28 11:40:00	Sublist3r	12 subdomains found (e.g., test.php.vulnweb.com, rest.vulnweb.com)
2025-08-28 11:45:00	Nmap	Only port 80/http open on 44.228.249.3
N/A	Shodan	Server: Apache. Hosted on AWS (ec2-44-228-249-3.us-west-2.compute.amazonaws.com)

Summary (50 words):
Recon on vulnweb.com revealed it is hosted on AWS behind Apache, with a long history. Despite its name suggesting vulnerability, only port 80 is open. Twelve subdomains were enumerated, indicating potential development and testing environments (e.g., test, dev, rest) that could be targeted for further assessment.

Evidence: See screenshots 01_WHOIS_vulnweb.png, 03_Sublist3r_Results.png, and 04_Nmap_Scan_vulnweb.png.
